CONSTRUCTION TYPES AVAILABLE

Great Aussie Caravans is the only manufacturer to offer 3 different construction techniques for your new caravan. Once you have decided on the floor plan and model, choose from Timbertech, Allytech or Fibretech for your preferred construction methodology.

- Meranti timber frame
- Tried & proven construction
- Flexible to allow movement whilst maintaining strength
- One piece, timber flooring
- Light weight CNC interlocking cabinetry provides strength & accuracy

- 100% timber free walls, roof, frame & floor
- Welded aluminium frame, which is strong & light
- Walls lined with fibreglass to protect against water damage
- Composite honeycomb floor which is lighter & well insulated
- XPS insulation upgrade in walls
- Exclusive interlocking cabinetry

- ECO-Friendly recyclable material
- Odourless
- Approx. 25% lighter than traditional framing
- B1 Low flammability rating
- Moisture resistance
- Chemical and corrosion resistance
- GAC Poly board
- Exclusive interlocking cabinetry

Great Aussie

CARAVANS

Great Aussie was founded by a group of passionate adventurers who believed in the magic of creating homes-on-wheels for fellow wanderers seeking to embrace the nomadic lifestyle. Their journey began with the humble yet sturdy caravans, designed to be the perfect companions for the road less traveled. From the very first caravan that rolled out of their workshop, it was evident that they were onto something special.

With decades of experience in manufacturing, testing and most importantly caravanning, we truly believe that we build the best RVs in Australia. With thousands of happy customers and multiple awards, we believe that when you purchase a Great Aussie, you don't just become a customer, you become part of the family.
